

ROSENAU

SUSTAINABILITY

SUSTAINABILITY: BEYOND GREEN PRODUCTS

Our Mission is to provide our clients with customized knowledge based solutions to achieve clean, healthy, safe and sustainable facilities at the lowest overall total cost.

Sustainability is an important topic and involves more than “green” products, equipment and processes.

Sustainability efforts should also contribute to the “Triple Bottom Line”:

People deserve and should expect concern for their health and wellness.

Planet recognizes the need to respect our natural resources.

Profit is at the heart of any business. Even non-profit organizations have a responsibility to manage their financial resources wisely.

Properly implemented sustainability strategies pay financial dividends, through enhanced image, and reduced waste.

CUSTOM SUSTAINABILITY PROGRAMS

Philip Rosenau Company assists in designing Sustainability Programs. We are dedicated to helping our customers deliver cleaner, safer, healthier and more sustainable facilities at the lowest overall total cost by offering the following:

Sustainability Assessment

We survey your operation to determine where your program is currently and identify opportunities for further advancement.

Procedural & Product Training

We offer Training Programs for all audiences.

Sustainable Product Reporting

We can provide a detailed report on your products purchased that earned 3rd party sustainability certification or contribute to earning LEED certification.

We believe that setting standards and measuring progress are critical steps toward continuous improvement

WASH CYCLE LAUNDRY

A sustainable laundry solution for mops and microfiber cloths used to keep your facility clean and healthy. Laundry is picked-up and delivered by bicycle.

TOOLS & BENEFITS

Asset Management

Our Equipment Service and Repair Department, are able to provide maintenance records to comply with LEED, CIMS-GB or other reporting requirements.

Equipment Recycling

We offer our customers the ability to recycle old cleaning equipment at the end of its useful life, instead of sending it to a landfill.

SUSTAINABILITY DASHBOARD

A web-based platform to track, manage and report your sustainability efforts.

Addresses energy, water, waste/recycling, transportation, purchases and societal efforts.

Easy to use and ideal for small to medium sized organizations from one building to entire portfolio.

Can automatically upload information from your suppliers.

Proprietary analytics to help identify opportunities for cost and environmental improvements.

Provides LEED, Energy Star and other reporting.

SUSTAINABILITY TOOLS AND BENEFITS

OUR CONTINUED COMMITMENT TO SUSTAINABILITY

In the early days we recycled a few things like toner cartridges, aluminum cans and equipment batteries.

KEY PROGRESS TO DATE

Recycling

Our program includes cardboard, shrink wrap, plastic, scrap metal and old cleaning equipment.

Operations

Since 2009, we have diverted more than 150 tons of waste and obsolete cleaning equipment from landfills.

Contributions

A key element of sustainability is social responsibility - helping others - while we have always supported a number of charities, the Philip Rosenau Outreach program allows our employees to support community efforts.

Energy

A project to convert our warehouse to use T-8 lighting reduced our electric consumption by more than 30%.

Since we can only improve what we measure, we track these initiatives on the Sustainability Dashboard. Philip Rosenau is committed to ensuring less waste, reducing our carbon footprint and working towards greener choices.

Please visit our website to see what we have been up to lately.
